

Full Pavée

By Cecil Purnell

Tourbillon. Hands in the centre

Breathtaking! A Cecil Purnell Jewellery piece, fully set with diamonds, of which size and quantity can be customized to your specific desire. Originally conceived as a unique piece but is now going to be produced in a small quantity. The one exception to its dazzling diamond clad exterior is the aperture showing the sophisticated mechanism that lies within : the Tourbillon. The diamonds carefully selected and arranged by knowledgeable craftsmen make a stunning contrast to the smooth lines of the white gold crown stand and the inside face of the bracelet. Do not be mistaken! This timepiece has been patiently manufactured by the “doigts d’or” artisans of Alle (Jura). The multi faceted diamond exterior beautifully catches light in an endless cacophony of bedazzlement!
