

## ***London Hambergé 8000 Titanium (Day Date)***

*By Cecil Purnell*

***Tourbillon. Double-calendar (Day-Date), Power reserve***

*Sporty and elegant, this tourbillon timepiece stands out. Like a forceful answer to the lightness of time inexorably passing and ticking away in its revolving cage. Crowned with the desire to show off more than just be noticed, the London Hambergé stamps its hedonistic Cecil Purnell attitude, absolutely! As if cut from a solid block, its complicated case emerges from eight intricately overlapping components elongated by its supple bracelet made of noble rubber topped by a folding buckle stamped CP. Strong and masculine, the perfectly water tight case can easily resist 8 atmospheres of pressure. An invitation to explore the depths of the passion it will give birth to. The pink gold 'poussoirs' make for slick and convenient correction of the days and date. They also beautifully balance its sense of proportion. Likewise, the carbon inserts set into the bezel, admirably enhance its engaging curves and hefty build. The vigorous performance of this exceptionally high tech timepiece will put your mind at rest in the most extreme conditions. Its solid build and distinguished dimensions will equally impress the aficionado and connoisseur with the quality of its manufacture as well as the consistency of its exquisitely complicated movement. On the reverse of the watch, through its anti reflection sapphire crystal, you can admire its mechanical soul as it turns over in a rare gesture.*

***« An invitation  
to explore the depths  
of the passion  
it will give birth to... »***
